Water volume: 650 litre

Dry weight: 220 kg

Savannah

The Savannah is a compact spa with a very efficient layout. Thanks to its limited height, this spa is easy to place indoors and also easy to get in and out of. The limited weight and space enables installation on your balcony or rooftop to offer a unique position for this Spa.

You can choose to sit next to one another or across from one another in the spa. The spacious lounge is equipped with a relaxing leg and foot massage.

Summarized: the Savannah is a spa that caters to all your wishes and in which you can relax and recharge. During the cold winter months, the warm water relaxes your muscles and joints while you breath in the fresh outdoor air.

Lisa

The Lisa ensures the best of both worlds by combining an ergonomic but efficient design which measures just over two metres by two metres. The Lisa offers a choice of either 23 jets (1 massage pump) or 38 jets (2 massage pumps). The filtration system and the full foam insulation guarantee the lowest running costs the whole year round. The extended lounger is surprisingly deep with a full body massage and the 3 corner seats each have their own massage pattern for the higher and lower back and shoulders. The Lisa 38 jet version even has 2 seats with extensive foot massage for improved blood circulation and revitalization of the body.

Augusta

The Augusta is large enough for the whole family and at the same time compact enough to fit in almost any (roof) garden or terrace. The characteristic modern design provides plenty of room to move about and is therefore also suitable for children. The seating positions have different levels so that there is always a place that fits your physique. Augusta is available in two different versions, with different numbers of massage jets, Augusta 20 (24 jets and 1 massage pump) and Augusta 40 (41 jets with 2 massage pumps). Any time of the day, the whole year round pure enjoyment for the whole family.

Julia

The Julia has very ergonomic and comfortable seating positions based on the pre-shaped design of each seat. The ergonomic design of this spa ensures the right support in the right places during the effective hydro-massage. The Julia also has a child and a cool down seat partially above the water, to refresh from the warm water. This model offers you a relaxing massage for any part of your body. A neck/shoulder massage is available in the first seat of the spa. Enjoy being outside and relaxing with a hydro-massage as soon as springtime shows its face.

Laura

The Laura has a unique design with two reclining positions next to one another. Both of these loungers have individual foot massage and a specific ergonomic design. The impact jet for seat 3, in its largest format, provides an intense massage for the lower back or the legs. The Laura is equipped with a child seat and a cool-down seat with a mild massage while you sit partially above the water. A neck/shoulder massage is optional at the first seat of the spa. Surrender to the massage of the jets under the starry sky: a perfect and relaxing way to relax after a busy day.

Sophia

The Sophia is a very spacious spa with different types of seating positions equipped with the most extensive massage options. The corner and bench seats are spacious and vary in depth, so you can sit next to or across from one another. The Sophia is equipped with a child seat and a cool-down seat where you sit partially above the water. The impact jet, in its largest format, provides an intense massage for the lower back or the legs. The sitting positions have a central foot and calf massage. Plenty of space and options, providing luxury for the whole family.

Flora

The Flora is the most spacious model of the 4SeasonsSpa range and is currently one of the largest spas available anywhere. The sitting positions are extra deep, making it very comfortable for people with a larger frame. The high number of jets allows you an extensive massage. Attention was even given to the palms and wrists with the design of a unique full-body massage pattern. The design of the Flora is barrier free and modern.

Anna

The Anna is a very spacious and luxurious spa which offers plenty of space to relax. The organic round shape is not only very esthetic, it also ensures the spa to be perfect for socializing with friends and family. With its extensive massage pattern, each of the six ergonomic shaped seats is unique. The ergonomic design and a variety of jets provide a comfortable and intense hydro massage. 4 seats in the spa even provide a foot massage to ensure a full body and ultimate relaxing experience. Enjoy your relaxing moment all year round with friends and family.

Personalize your Spa

Audio

Enjoy your favorite music while relaxing in a 4SeasonsSpa with the wireless audio system. Through a Bluetooth connection your personal audio device (MP3/iPod) is connected to a built-in audio device with 4 speakers and a subwoofer. Your audio device can be left safely and dry and pass on to the next song or control the volume from inside your spa. The (vibrating) speakers do not only provide a powerful sound, they are also invisibly and aesthetically built-in the spa.

Energy saving

Relax in your spa and use less energy. To save energy, 4SeasonsSpa has developed a configuration which heats your spa through a present heat source (central heating, solar). With this heat exchanger a green solution is offered to warm your Spa up to 4 times quicker and environmental friendly.

Crystal clear water

Water disinfection

Optimal water quality and minimum maintenance.

The UV-C Lamp, developed in partnership with Philips is a unique innovation in terms of water treatment.

The lamp disinfects the spa water and breaks down bounded used water sanitizers such as chlorine. By breaking down the used sanitizers less new sanitizers are required to control the water quality. The UV-C lamp will be better for you and the environment.

Pure water

To achieve the highest level of water quality with minimum maintenance, the powerful AFM filter can be connected to each Spa model except the Savannah. This external filter is the most durable and stable

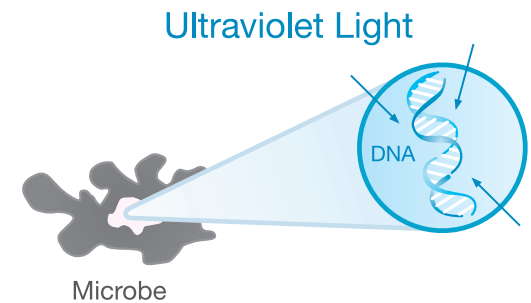

technology for water filtration. AFM (Activated Filter Media) is manufactured from reprocessed glass and filters at least 30% more from your water. Applying an AFM filter not only guarantees pure water with low maintenance, it also reduces the use of sanitizers. The AFM Filter placed on a distance, next to your Spa or as part of an Overflow System with balance tank.

Overflow

For a stable water-level in your Spa, irrespective of the number of people in the Spa the Overflow system can be installed. This system includes a balance tank storing the excess water temporarily and using an AFM filter for the waterfiltration.

Working of UV-C light

The Ultraviolet light breaks down bounded sanitizers such as chlorine and the DNA structure of other undesirable organisms (microbe) present in the water.
